

## Ensuring Connectivity for the Digital Economy

# Proservia Network Services

With today's society being increasingly shaped by uprising Millennials, disruptive start-ups and digital restructured enterprises, it is business critical for public and private organizations to adapt and embrace challenges deriving from these changes.

Network infrastructure needs to adjust to

- > always-on behavior (any place & any time)
- > secure connectivity of exploding number of connected devices (IoT & mobile devices)
- > ensure data and infrastructure security (privacy, integrity and availability)
- > seamless integration of cloud services and increasing demand of bandwidth
- > faster development and lifecycle for applications and services requiring more agile connectivity solutions

Following the evolution from static, rigid and connectivity-driven environments to infrastructures that need to provide flexibility, secure connectivity and application-awareness, networks need to be easy and fast to deploy and maintain, scale in line with your business needs and provide insight into network data and applications.

## Market Trends

- > By 2020, 70% of the entire workforce in the enterprises will be mobile workers.  
(Gartner Forecast Overview: Enterprise Communications Services, Worldwide, 2017)
- > Today, there are nearly 3B IoT devices installed in the enterprise. By 2020, there will be 7.6B—CAGR of 33%  
(Gartner Forecast Overview: Devices, Worldwide, 2017 Update)
- > By 2018, public cloud spending will grow to \$127 billion  
(IDC Press "IDC Forecasts Public IT Cloud Services Spending Will Reach \$127bn", Mobile devices and cloud apps are bringing down the WAN)
- > Cybercrime will cost the world \$6 trillion annually by 2021, up from \$3 trillion in 2015.  
(Cybersecurity Ventures, 'Hackerpocalypse: A Cybercrime Revelation' report, published in August of 2016)

## Why Proservia

We are convinced that the digital transformation can only be successful when integrating the human factor. Changes in an organization need to be addressed holistically considering "man power" and IT topics together.

We call it peopleIT.

## Proservia Solution

Using standards-based technologies, intelligent data correlation and automation Proservia is providing solutions to enable your network to follow your business.

With the approach that all our solutions have security built-in from bottom to top, we define the optimal solution regarding service cut, technology and flexible sourcing and handle the impact of change to your organisation, together.

## Network Services

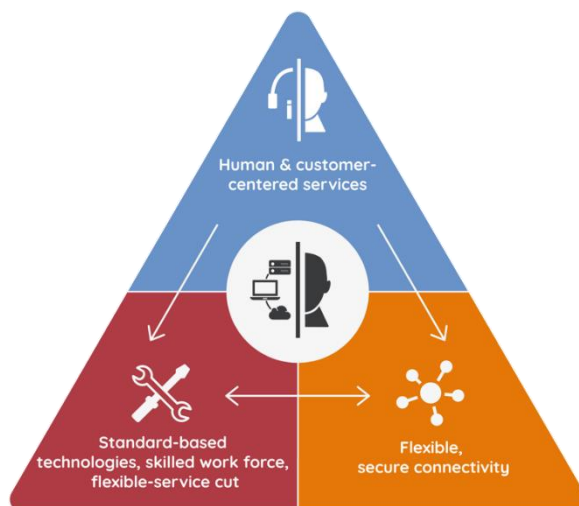

Covering a wide spectrum of modern network and network security solutions to connect users, devices and application according to your requirements Proservia is committed to provide the best fitting solution and service to your business whether it is a single engagement, a long-term project or a permanent partnership.

### Professional Services

- > Solution workshops  
e.g. Network Access Control (NAC), firewall management solution
- > Assessments  
Analysis & proof of concept  
e.g. availability or voice/video assessment, WLAN survey and Implementation
- > FlexScope  
Consulting, design and roll-out services

### Managed Services

- > User connectivity  
LAN/WLAN/Skype/voice, remote access
- > Site connectivity  
(SD-)WAN, WAN optimization, internet access
- > Application connectivity  
Load balancing, application delivery controller, web application firewall, datacenter LAN
- > Network security  
Firewall, IPS and proxy, authentication, advanced security
- > Carrier management  
Benchmark, service improvement, contract management

## Proservia Network Competency

With more than 80 highly skilled network specialists we are supporting enterprise customers for more than 25 years from Germany. We have experience with all major network product vendors and hold certifications in Aruba, Fortinet and Cisco.

Established relationships with major national and international carriers for many years position us for managing your carrier relationships.

While strong knowledge in each of the individual areas is the foundation, our real strength comes with combining and integrating technology, people and processes.

Our approach is to holistically support customers as well as working in close collaboration with partners to achieve best customer benefits.

As a **vendor-independent** service provider, Proservia can ensure that your environment is not only deployed into but **integrated** with your existing infrastructure including platform and workplace solutions.
