

Securing your information means securing your business

## Security Services

In a connected, data-driven world that relies on cloud, virtual and mobile computing, how do you safeguard the information that runs your business? Technical security solutions and an effective security governance work hand in hand to create the secure environment that allows you to keep your business safe.

### Security Principles

We recognize the value of our clients' information and keeping it on highest security levels is a natural part of our company culture.

#### Security by Design

Security is embedded in our services and solutions. From the first day of development, we include security principles, such as:

- > Minimized attack surface
- > Defense in depth
- > Least privilege
- > Separation of duties
- > and keep security simple!

#### Security by Default

There is a balance to strike between usability and security. Our services and solutions come with:

- > Secure default configurations
- > Monitoring and logging
- > Auditable processes

### Technical Security

Technical solutions shield your information assets from attackers or accidental disclosure and ensure it is available to you when needed. Proservia's Technical Security services include:

- > Endpoint protection (antivirus, personal firewalls, malware protection, encryption)
- > Email- and traffic-encryption
- > Cloud security
- > Network security
- > and more...

### Information Security Governance

An efficient governance allows you to manage your risks, prioritize correctly and make the right decisions for your business. It outlines the policies and orchestrates technical and non-technical controls according to the business requirements.

Proservia operates its own ISO27001-certified information security management system (ISMS) internally and can help you to define, set up, improve or run your own InfoSec governance.

Information assets, threats and vulnerabilities are managed in a consistent framework that provides full visibility while choosing an appropriate approach to run security management in an efficient manner.

### Why Proservia

We are convinced that the digital transformation can only be successful when integrating the human factor. Changes in an organization need to be addressed holistically considering "man power" and IT topics together.

We call it peopleIT.

## Technical Security Services

Proservia offers a broad selection of IT security services, highlighting just a few here:

### Network Security

Proservia offers professional- and managed services to protect access to your network and secure communication and data exchange:

- > Network Access Control (NAC)
- > Firewall services
- > Intrusion prevention and detection
- > VPN RAS
- > Site-site VPN
- > Secure internet access

### Cloud Secure

The Cloud Secure service supports customers in securing their AWS environment. It comprises three phases:

- > CloudCheckr assessment
- > Best practice consulting with actionable remediation suggestions
- > Remediation planning, deployment and post-implementation report

### Secure Access (MFA)

Proservia helps clients integrate Multi-Factor-Authentication into their IT environments:

- > Solutions by Cisco, RSA, Fortinet and other leading suppliers
- > Integration with existing IT landscape
- > Service management, support and logistics

## Information Security Governance

Proservia delivers ongoing ISMS operations as a managed service, or individual components to customers by way of outsourcing or out-tasking.

Our InfoSec consultants and certified Lead Auditors also support clients during projects such as:

### Certification Audit Preparation

- > Prepares clients for a successful certification audit
- > Conduct a test audit
- > Check ISO27001 conformity
- > Perform gap analysis
- > Propose mitigation
- > Issue comprehensive report

### InfoSec Risk Assessments

- > Scenario based identification and evaluation of InfoSec risks across an organization
- > Conduct risk interviews
- > Analyse and aggregate risks
- > Create / update risk register
- > Prepare summary risk profile and full report
